

# Members Connect

Issue 1 – 2008

Dear Custodians,

Welcome to the first newsletter of the Church of Conscious Living. Since our launch, on January 19<sup>th</sup>, we have had many individuals & families swell our numbers, making us into the vibrant group we are today.

For those of you who were unable to make our launch, our Church officially commenced on a beautiful warm & sunny Saturday afternoon at Hamilton Hall. Our banner was ready for the start of festivities, which saw 6 speakers take part - Jeanette from “ Qld. against Water Fluoridation”, Stephanie, Susan & Roxanne from “ Vaccination Awareness Information Service”, as well as Adriano & myself. This was followed by the ceremonial cutting of the watermelon. Afterwards, we feasted on the vast array of fruits, nuts & other delicacies that laden down the tables. It was a very happy event, with much warmth & support from like minded individuals coming together on the day.

Please see below for details of our next meeting, which we hope many of you will be able to attend. Please feel free to pass this newsletter on to those, who you think will have an interest in our Sacred Laws & our Church. Membership is open to all.

For newcomers receiving this newsletter, membership forms can be downloaded from our web page - [www.churchofcl.com](http://www.churchofcl.com) - Our Mantra & Sacred Laws can also be viewed on our web site.

We look forward to catching up with everyone.

Regards  
Jane & Adriano

## NEXT MEETING:

Date: November 16<sup>th</sup>.

Time: 11am - 2pm.

Venue: Colmslie Recreation Reserve, Morningside. ( Lytton Rd. )

BYO: Picnic, rugs/ chairs.

Look for the banner. Hope to see you all there.

## News Items;

- After Australia's largest pharmaceutical recall in 2003, Pan Pharmaceuticals chief executive Jim Selin has won a long running battle in courts, being awarded \$55 million by the Commonwealth in compensation & legal costs after the Federal Court found a government agency had been negligent.

- A new Federal Draft ADHD Guidelines ( to be used by teachers, doctors, the justice system & carers of these children ) has been released has been released for public comment by the Royal Australian College of Physicians. These guidelines state -

1. Parents need to be told that elimination or restrictive diets such as eliminating food additives & preservatives, eliminating sugar or potentially allergenic products, may be of little or no benefit.
2. Dietary supplements such as essential fatty acids & homeopathy may also have little or no benefit.
3. Little evidence to assess chiropractic effectiveness, & whether sport or exercise helps is yet to be determined.
4. They recommend schedule 8 drugs such as Ritalin & dexamphetamine as a first line treatment.

To view these draft guidelines in full , they can be found at [www.racp.edu.au](http://www.racp.edu.au) & follow the links.

- DOCS have been in the media lately for going above & beyond their jurisdiction in hounding a young couple to have their child vaccinated, forcing this family into hiding. What happened to non - compulsory vaccination?

- We have had some wonderful unseasonal Sept. rains, which will give a boost to all our vegie gardens, & flowering bulbs.

“Stay true to who you are & how you want to live”
